

Restoration of St Paul's Anglican Pro-Cathedral

ERDF Project PA5.0145

Tender for the Design, Build, Supply, Installation and Commissioning of a Retractable Platform Lift & Vertical Lifting Platform on the Parvis

REFERENCE NUMBER: SPAPC.ERDF 006/2021

CLARIFICATION: 01

Site Visit

26th January 2022 9.00am

The Contracting Organisation explained that the project is EU funded, having specific timeframes and procedures.

The works envisaged for the retractable platform lift were discussed and the requirements highlighted – the platform is to convert to steps when in the parked position. The retractable platform lift control panel is to be located in the current caretaker's room and is to be radio-controlled. The steps are to have a stone finish. Excavation works will be carried out before the lift is installed as part of another contract of works – these might uncover archaeological remains. In the case of discovery of remains, the Superintendence of Cultural Heritage will be brought in for a discussion on the way forward.

The works envisaged for the vertical lifting platform on the parvis were discussed and the requirements highlighted. Excavation works will be carried out before the lift is installed as part of another contract of works. The lift on the parvis is to have 3 no. stops, as described on the tender drawings.

All other tender documents, conditions and requirements, which are not superseded by this clarification, remain in place.

Operational Programme I – European Structural and Investment Funds 2014-2020
“Fostering a competitive and sustainable economy to meet our challenges”
Project is part-financed by the European Regional Development Fund
Co-financing rate: 80% European Union; 20% St Paul's Anglican Pro-Cathedral Funds
